With the increased changes in compliance and regulations, you need the ability to effectively manage risks and your PSM Program. Lack of documentation and failure to resolve issues, can result in severe penalties and significant damage to your company's brand. Ultimately, you need a company that can provide peace of mind and works with your facility to reduce risks and minimizes the overhead costs of compliance.

PROTEXUS stands apart from other companies providing the tools necessary to allow full, easy access to the information you need to manage your PSM Program.

Our business model has changed with time, but our focus to provide the best solutions to our client's has remained constant. With change, comes new ideas. In 2013 PROTEXUS developed a plan to provide a paperless solution to their clients. PROTEXUS developed PSM PRO software, to reside in the Cloud, to offer easier access, faster delivery of updates, and improved security. While this has required a greater research and development commitment, it has allowed for greater product control which has resulted in building a complete PSM Program software with innovative ease-of-use, improvements and unique features while maintaining a competitive price point of $1,995.00, and an annual maintenance/license fee of $199.00 per facility. Visit: http://www.protexus.com/protexus-web.html for more information.

PROTEXUS has the expertise required to meet all your compliance needs including: Mechanical Integrity Inspections, Compliance Audits, PSM Program Development, Risk Management Plan, Process Hazard Analysis, and PSM/RMP Training. In 2014 PROTEXUS developed our Total Compliance Solution which takes care of your entire Process Safety Management Program. PROTEXUS will develop, manage, and maintain documentation, task, and records to comply with OSHA and EPA regulations for Process Safety Management.

PROTEXUS has the extensive expertise to remove the burdens of compliance allowing our client's to concentrate on operations while maintaining ongoing compliance.

We strive to provide the highest quality services while delivering solutions to our clients. Whatever your compliance needs, PROTEXUS resources are available to support you on your next PSM program project.

We take into consideration the needs of everyone in the compliance process. From the employees to the top managers, our compliance is built on a foundation of reliability and respect.

PROTEXUS recognizes that a successful project depends on the involvement and understanding of the industry and our clients. Understanding the potential risks, impacts, and regulatory issues allows us to develop viable and cost-effective solutions. Our dedication, work ethic and years of experience have earned us an A Rating with ISNetworld and a loyal client base.
